## Getting the right dashcam for your Mitsubishi

Dashcams are common car accessories. There are a wide range of dashcams in the market. How do you choose the right dashcam for your Mitsubishi?

The most basic dashcams are plugged into the car's cigarette lighter or can be powered up from a battery. Others are more complicated and requires installation to the car's electrical system. It is recommended to go for a HD-quality camera to ensure that your recordings do not miss out important details like license plate numbers during a car accident.

Dashcams that are plugged into the cigarette lighter are easy to install but may result in unsightly wires running across the windscreen and on the dashboard. Dashcams that tap into car's electrical system are neater as wires are concealed, however, it's best to have it installed by professional workshops to ensure that it is properly installed. Dashcams purchased from Cycle & Carriage comes with 1-year warranty. Most importantly, we ensure that the dashcams are installed according to manufacturer guidelines.

Also, did you know that if your car is insured with our auto insurance partner, AIG, your excess will be waived\* if you are able to submit the accident footage as evidence. You can potentially save a few thousand dollars from this excess.

What are you waiting for? Invest in a good dashcam. You'll never know when you will need it!
