CITROËN

**NEW
CITROËN C4**

KEY ADVANTAGES

NEW GENERATION COMPACT HATCHBACK

A new step forward in Citroën design, the elegance of a hatchback combined with the strength of an SUV.

PAGES 4 - 11

SUSPENSION WITH PROGRESSIVE HYDRAULIC CUSHIONS®

An exclusive Citroën innovation for perfect comfort and a flying carpet effect.

PAGES 12 - 15

ADVANCED COMFORT SEATS

Wide and welcoming seats, offering a raised position, for travelling in a lounge on wheels.

PAGES 16 - 17

Scan this code with your smartphone to access the New Citroën C4 video tutorials.

SPACIOUS INTERIOR

The light and generous interior space comfortably accommodates three passengers in the rear.

PAGES 18 - 19

CITROËN SMART PAD SUPPORT™

This ingenious system, built into the dashboard, allows you to attach your tablet securely.

PAGES 20 - 21

NEW AUTOMATIC GEARBOX CONTROL

Takes the pleasure of driving to new heights.

PAGES 30 - 31

SAFETY AND DRIVING AID SYSTEMS

Technology which improves safety while enhancing onboard comfort.

PAGES 34 - 39

Not all equipment shown in this brochure is available on every version.

DESIGN

With an elevated dynamic posture, the new Citroën C4 is a new vision of a compact hatchback. This new, assertive expression of style links closely to the brand's own new values, with this modern design thanks to its range of 7 colours.

ELEGANT AND AERODYNAMIC

New Citroën C4 harmoniously combines the smooth and refined lines of a hatchback with the generous space and strength of an SUV. This, along with the inclined roof line, gives it an aerodynamic profile that's unique in its category. This sense of purpose is enhanced by large diameter wheels and a raised posture as if ready to pounce.

A FRESH AESTHETIC APPROACH

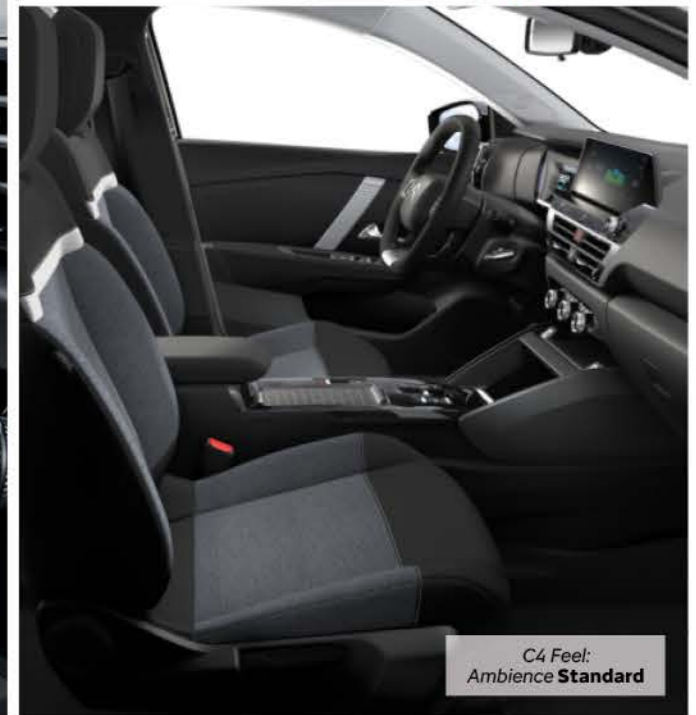

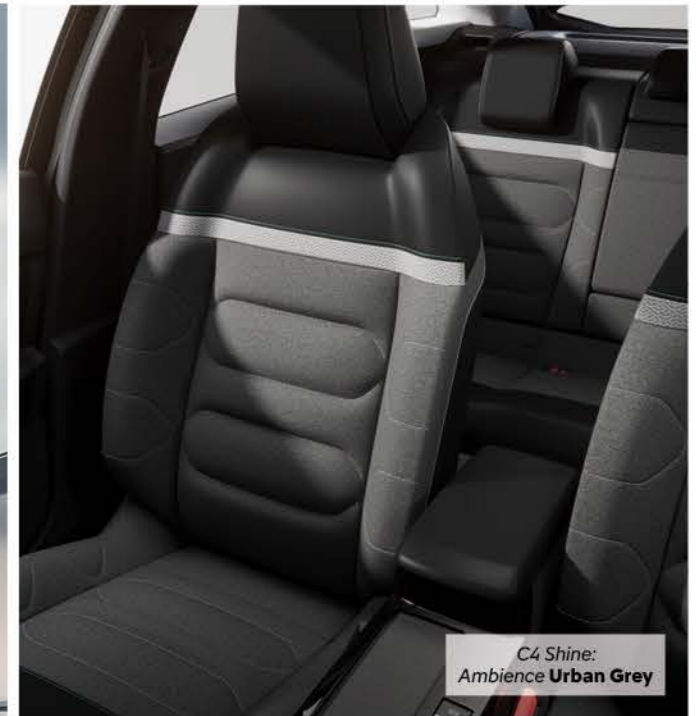

The unique character of New Citroën C4 is based on the brand's new identity, which was launched at the beginning of 2020. This is expressed particularly by the modern and technological front end, which has 100% LED two-tier lighting and chevrons spanning the entire width of the car. This dynamism and strength is continued at the rear end, where its rear lights are connected by a gloss black finisher.

INTERIOR AMBIENCES

Modernity and wellbeing combine onboard New Citroën C4. New motifs are featured on the seats, whilst satin chrome or gloss black touches complement warm and soft materials throughout. With the subtle, welcoming tones of the Standard Ambience or Urban Grey ambiances, you'll feel at home from the moment you open the door.

The **Urban Grey** ambience combines the comfort and discretion of the padded grey Chevrons cloth, with a black leather-effect textile and a grey cloth band with screen-printed chevrons graphic motif.

The **Standard Ambience** is timeless and simple, with a black cloth combined with a grey band.

COMFORT

The Citroënist
Est. 1919

Contemporary and welcoming, C4's interior has been designed to ensure serenity reigns supreme. The CITROËN ADVANCED COMFORT® programme delivers innovative, technological and intelligent solutions to create wellbeing for drivers and passengers alike, and confirm Citroën's driving-comfort credentials. Four main themes are at the heart of this comfort engineering: the cocoon effect, practicality, fluidity and peace of mind.

FILTER
OUT STRESS

MAKE LIFE
ON BOARD EASIER

LIGHTEN
THE MENTAL LOAD

IMPROVE
THE FLOW

CITROËN SUSPENSION WITH PROGRESSIVE HYDRAULIC CUSHIONS®

On board Citroën C4, you'll experience a supreme feeling of wellbeing and driving pleasure thanks to Suspension with Progressive Hydraulic Cushions®. This gives driving a real flying carpet effect across slight compressions and avoids any rebound effect on poor road surfaces. A Citroën innovation for a new experience in comfort.

ADVANCED COMFORT SEATS

Another exclusive Citroën innovation are the Advanced Comfort seats of Citroën C4. These provide comfort in many different ways; visual comfort thanks to visible padding; welcoming comfort with immediate softness and support; dynamic comfort from high-density foam at the heart of the seats which avoids any sagging over time; and finally, comfort in posture through the lumbar and height adjustment of the front seats – complemented by the wide side and central armrest on the front seat.

EXCEPTIONAL INTERIOR SPACE

With a wheelbase of 2,665 mm, one of the longest in its category, New Citroën C4 provides a generous passenger compartment, with rear passengers benefitting from impressive legroom. Thanks to its width, it accommodates three people in the rear without compromising on comfort.

CLEVER AND ERGONOMIC EQUIPMENT

Designed in accordance with the Citroën Advanced Comfort® programme, New Citroën C4 brings innovation to the onboard equipment. The front passenger can enjoy the Citroën Smart Pad Support™, a clever retractable support system built into the dashboard which lets them secure their tablet in complete safety. The centre console contains a built-in magnetic-induction charging mat for smartphones and all devices compatible with the Qi standard. Type A and C USB sockets* are also fitted at the front and rear of the centre console.

*C4 Feel: 3 USB ports
*C4 Shine: 4 USB ports

Front Sliding Drawer

High Centre Console with Armrest

BOOT VOLUME
UP TO
1,250L*

*With the rear seats folded down.

Boot with up to 1,250L of space

STORAGE COMPARTMENTS FOR EVERYONE

The generous 380L boot is easily accessible thanks to its low, flat-loading sill and is flexible enough to meet every need. When the rear bench seat is folded, the space is optimized to accommodate bulky objects. On board New Citroën C4, you'll find numerous practical storage compartments including a sliding drawer on the dashboard in front of the passenger which is ideal for storing a tablet whilst keeping the glove box free.

For the front passengers, cup holders and a storage space have been built into the armrest of the center console.

REAL DRIVING PLEASURE

Continuing the brand's heritage, New Citroën C4 excels when it comes to their driving experience. Refined interior acoustics courtesy of reduced road noise and the insulated engine compartment are supplemented by soothing lighting for all passengers: and the glazed surfaces let light flood into the entire passenger compartment. With dual zone automatic air conditioning, this car provides temperature-related comfort in all conditions.

TECHNO LOGY

New Citroën C4 is equipped with up to 16 driving assistance systems, all developed to improve driving safety and to reinforce onboard comfort.

CONNECTIVITY TECHNOLOGY

CITROËN CONNECT PLAY

This technology, which includes the Mirror Screen function (compatible with Android Auto and Apple CarPlay™), reproduces your smartphone's apps on the car's touchscreen, letting you use them safely. When it comes to charging, New Citroën C4 has up to four USB sockets, which means that everyone onboard can charge their smartphone. There's also a charging mat built into the centre console to charge a smartphone via wireless charging.*

*Available for Shine only

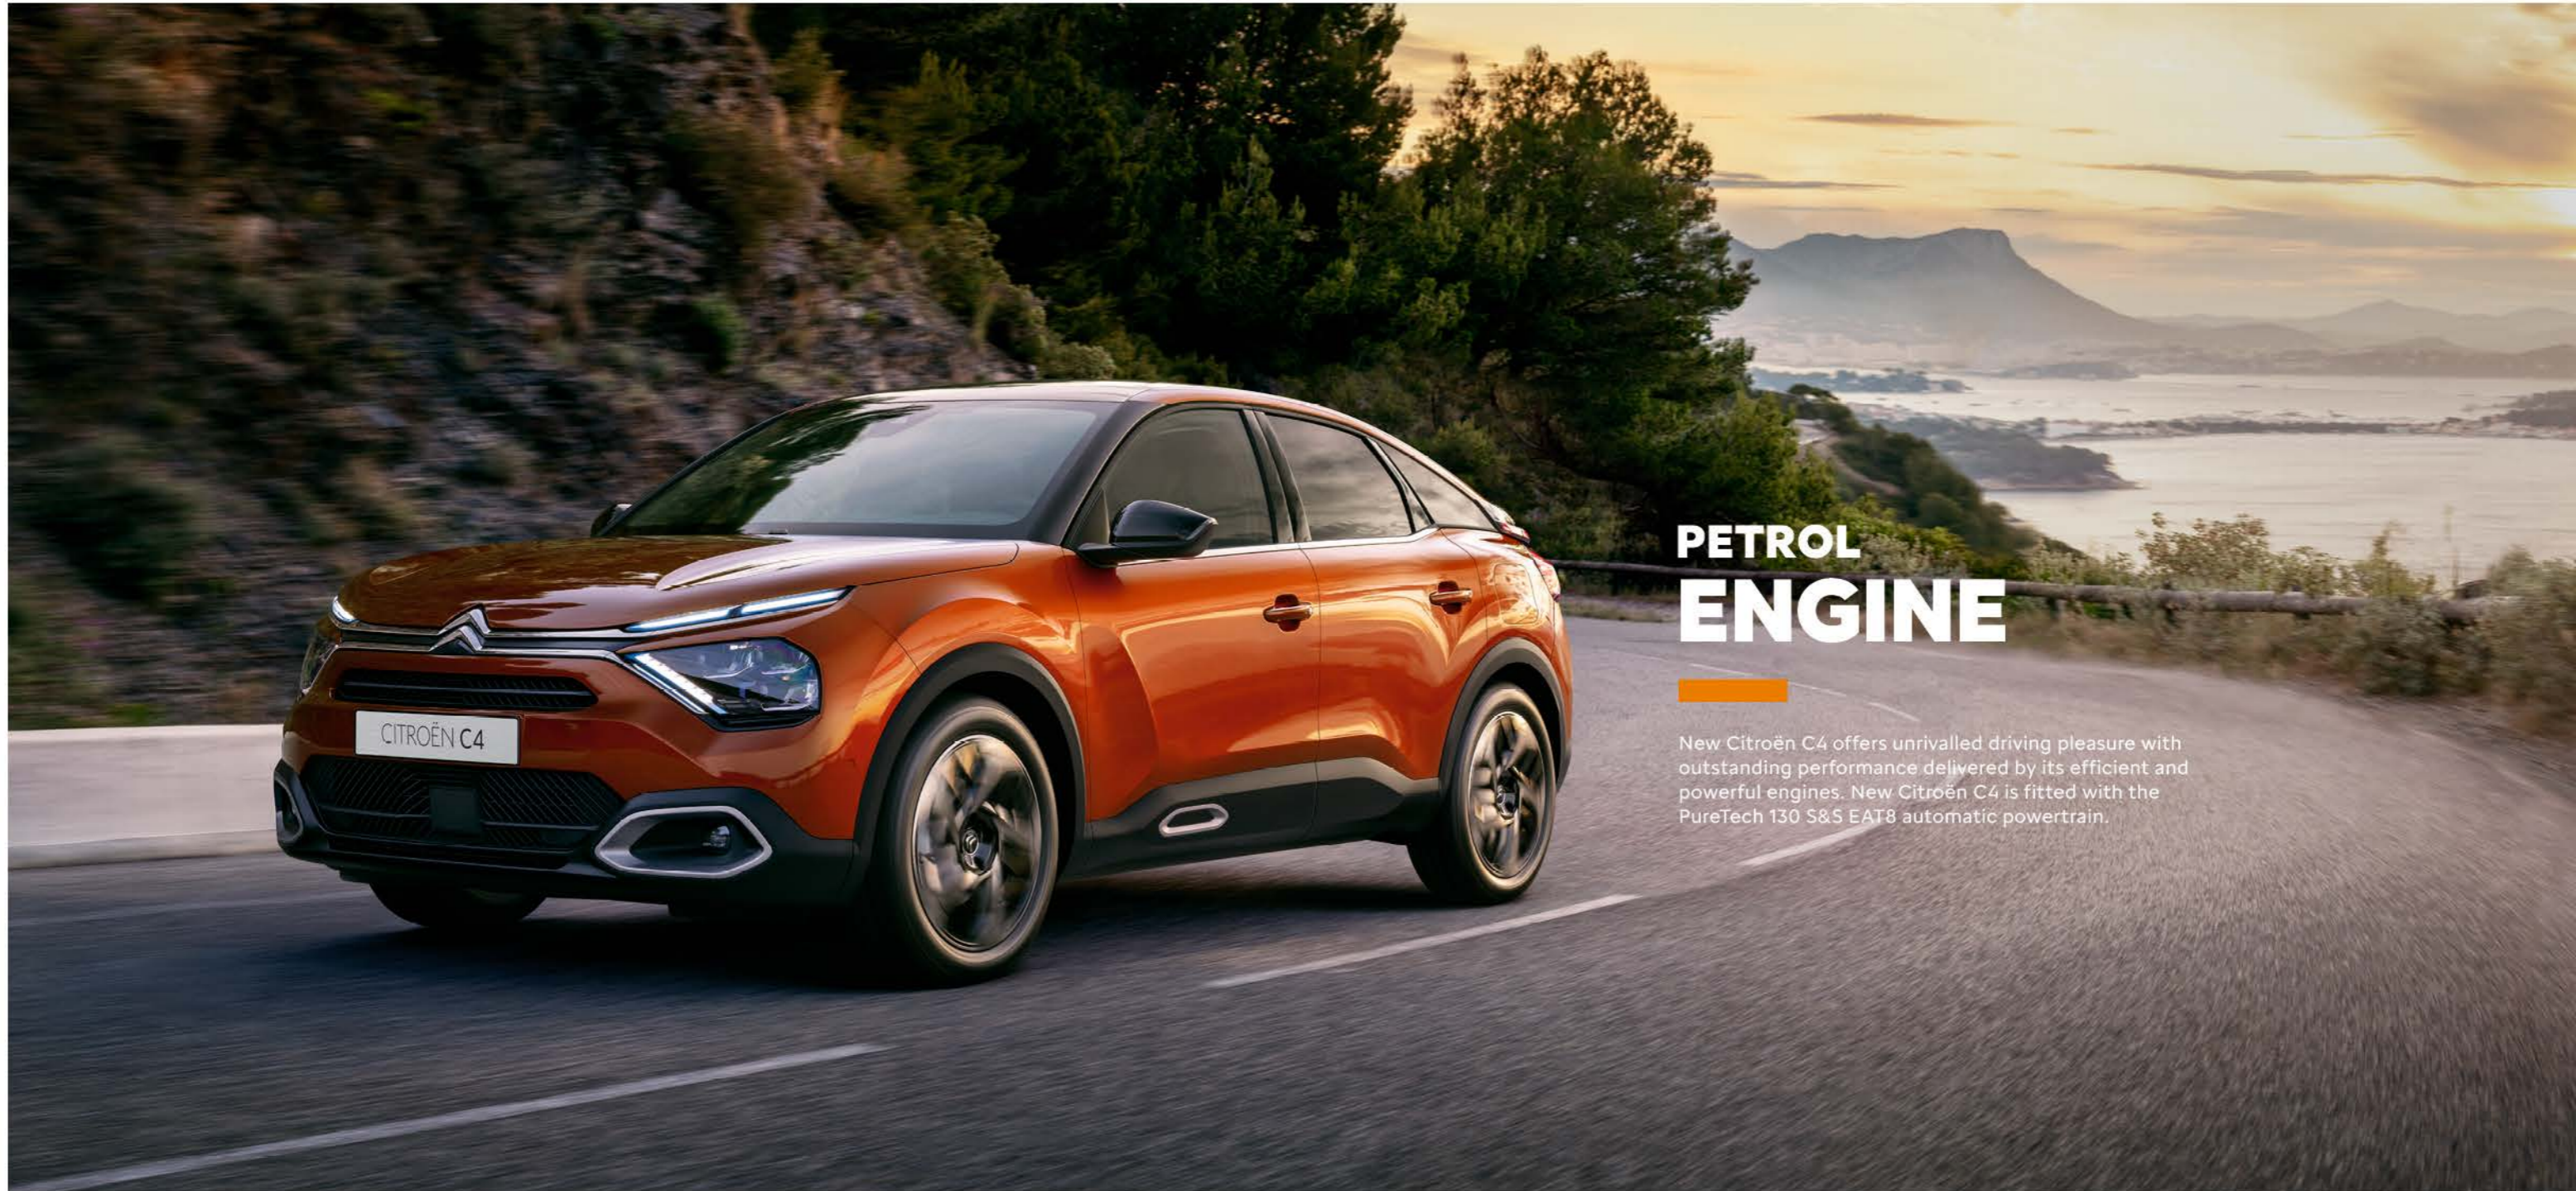

AUTOMATIC GEAR- BOX

New Citroën C4 features a new automatic gearbox control with an elegant guilloché metal design. It has three easily-selected positions: reverse (R), neutral (N) or forward drive (D). It's also linked to two backlit buttons: P to activate park mode, and M to activate manual driving mode.

PETROL ENGINE

New Citroën C4 offers unrivalled driving pleasure with outstanding performance delivered by its efficient and powerful engines. New Citroën C4 is fitted with the PureTech 130 S&S EAT8 automatic powertrain.

TOWARDS THE AUTONOMOUS CAR

The Highway Driver Assist* semi-autonomous driving system combines the Adaptive Cruise Control (with Stop & Go function) with a system that keeps the vehicle in its lane. This means the driver no longer needs to manage the speed or the trajectory on multi-lane roads as these are controlled by the car. Note that for this to remain active, the driver's hands must remain on the steering wheel. Coloured Head-Up Display* helps the driver to keep their eyes on the road while still having key driving information within your field of vision.

*Available for Shine only

Coloured Head-Up Display (Shine only)

Highway Driver Assist (Shine only)

SAFETY AND DRIVING AID SYSTEMS

COLOURED HEAD-UP DISPLAY*

Using a transparent panel to display key driving information (current and recommended speed, cruise control or speed limiter setting, navigation guidance and collision risk alert) within the driver's field of vision, the Coloured Head-Up Display helps the driver to keep their eyes on the road.

ADAPTIVE CRUISE CONTROL* WITH STOP & GO FUNCTION

The system detects the car in front and automatically maintains the safe distance chosen by the driver by applying the brake and the accelerator, until the vehicle comes to a complete stop. The vehicle can also move off again without any action taken by the driver.

HIGHWAY DRIVER ASSIST*

This technology allows the driver to delegate some of the driving to the car itself. The system maintains the position of the vehicle in its lane and manages stopping and moving off again in relation to the car in front.

ACTIVE SAFETY BRAKE

This emergency braking system reduces the risk of collisions. It works from speeds of 3 mph with fixed or moving objects and with pedestrians. If a risk of collision is detected, the system alerts the driver. If the driver does not react, the system brakes automatically.

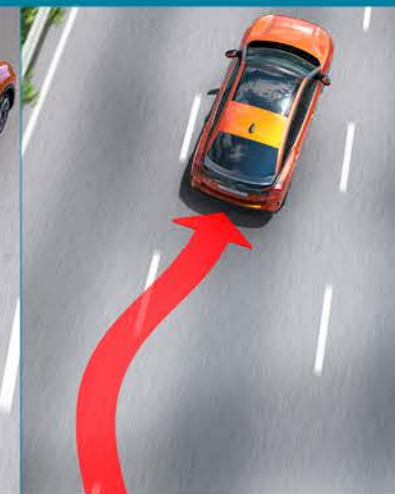

COLLISION RISK ALERT AND POST-COLLISION SAFETY BRAKE

The system warns the driver if there is a risk of a collision with the vehicle in front at speeds from 19 mph. This happens just before automatic braking is triggered. After a collision, the brakes are activated automatically to immobilise the vehicle and avoid a follow-on accident.

DRIVER ATTENTION WARNING

This system assesses the attention levels of the driver by monitoring the car's trajectory in relation to lane markings. This function is particularly suited to fast roads, at over 40 mph.

LANE KEEP ASSIST

This system uses a camera which recognises solid and broken lines on the road. If the line is approached without the indicators being activated, the steering will gradually counter-steer to keep the vehicle in its initial lane.

BLIND SPOT MONITORING SYSTEM*

This monitoring system is very useful on roads with more than one lane, as it notifies the driver that there is a vehicle in the blind spots using an orange LED located in the corner of the door mirrors.

SAFETY AND DRIVING AID SYSTEMS

HIGH BEAM ASSIST*

Depending on the traffic, the Intelligent Beam Headlights system automatically switches between main and dipped beams when vehicles are detected approaching from the opposite direction or overtaking. It provides optimum lighting when driving at night.

EXTENDED ROAD SIGN RECOGNITION AND SPEED RECOMMENDATION*

This system informs the driver of the current speed limit. When the camera detects a speed limit sign, the driver can accept the recommended speed and make it their cruise control or speed limiter speed setting. "Stop", "No Entry" and "No Overtaking" signs are also detected.

PARKING SENSORS

This system lets the driver know how close obstacles are to the sides of the car when manoeuvring. It uses information from the sensors on the front and rear bumpers, combined with the trajectory of the vehicle.

Feel: Rear sensors only
Shine: Front and rear sensors

PROXIMITY KEYLESS ENTRY AND START

This system allows you to lock, unlock and start your vehicle while keeping the key in your pocket or bag. The vehicle recognises its driver when they approach.

ELECTRIC PARKING BRAKE

The Electric Parking Brake is applied automatically when the engine is switched off and is released when the vehicle moves off. This brake can also be applied and released manually, by operating the control lever.

REVERSE CAMERA

When reverse gear is engaged, the camera provides the view behind the vehicle on the touchscreen, enhanced with coloured lines.

HILL START ASSIST

This system prevents any unwanted movement of the vehicle on a slope when the brake pedal is released. Hill Start Assist operates on gradients of more than 3% by stabilising the vehicle for approximately two seconds. The driver can therefore calmly move from the brake pedal to the accelerator pedal.

LED CORNERING FOGLAMPS

This provides an additional beam of light on the inside of the bend to increase visibility and safety on bends and at junctions.

CITROËN CARE

At Cycle & Carriage, we take pride in the competence of our after-sales staff, who are well-trained and fully qualified to look after your CITROËN vehicle. Our team is always kept up-to-date with the latest developments in the automotive industry, thanks to a rigorous ongoing training programme conducted by our in-house trainers, as well as trainers from the Manufacturer.

With more than a century-long history in the automotive industry in Singapore, you can entrust your vehicle to Cycle & Carriage, knowing that we use the latest recommended diagnostic system – Diagbox, from the Manufacturer. We also use Grade A genuine parts and the right specifications of lubricants and consumables, so as to keep your CITROËN vehicle running at its optimal condition. This is especially important in a hot and humid climate like Singapore.

FOR ADDED PEACE OF MIND, ALL CITROËN CARS COME WITH A TOTAL OF 3 + 2 YEARS/200,000KM WARRANTY (WHICHEVER IS EARLIER).

For more information on aftersales services and a hassle-free booking, please download the **myC&C** app.

This brochure is intended to demonstrate the general appearance of the CITROËN C4. Some of the photographs depict left-hand drive vehicles whose specifications may not necessarily conform to vehicles imported into Singapore. Cycle & Carriage France Pte Ltd reserves the rights, whilst preserving the essential characteristics of the models described, to introduce at any time modifications and changes of details, equipment or accessories considered necessary.
